PHASE 7 – PROJECT DOCUMENTATION

Project: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

1. Documentation Objective

To document the complete project process, including the problem, requirements, design, development, testing, and final automation outcome.

2. Documentation Contents

Section	Details to Document
Project Overview	Project title, problem statement and purpose
Requirement Analysis	Functional and non-functional requirements
Project Design	System workflow and Flow Designer logic
Development	ServiceNow configuration and implementation steps
Testing	Test cases, expected results and validation
Final Output	Approved request creates and assigns Catalog Task
References	Screenshots, GitHub files and project resources

3. Documentation Format

Project files will be maintained phase-wise in the public GitHub repository. Relevant ServiceNow screenshots and configuration details will be included as supporting evidence.

4. Final Workflow to Document

Standard Laptop Request → Approval → Flow Designer Trigger → Catalog Task Creation → Hardware Assignment → Laptop Configuration

5. Documentation Outcome

A clear and complete project record will be prepared so that the automation process, testing results, and final output can be easily understood and demonstrated.
